For the attention of Steven Bell – Project Tram Director

Dear Sirs,

**Edinburgh Tram Network Infraco
Project Carlisle – Guaranteed Maximum Price Proposal**

As you are aware, under an initiative known as "Project Carlisle", Infraco has been requested by tie to develop a Guaranteed Maximum Price Proposal based upon a reduced scope and accelerated programme in an effort to allow tie to obtain a cost effective and revenue generating tram network.

While we believe the attached Proposal and Programme are both comprehensive and achievable, we are fully cognizant that not every tie desire has been incorporated, and as a matter of clarity, not every Infraco cost has been included in the price.

For the purpose of audit and transparency, and as already in place, we are fully prepared to enter into discussion with Mr Jim Molyneux of Gordon Harris Partnership in an effort to transfer the necessary knowledge of how this Guaranteed Maximum Price was prepared so that he can subsequently discuss this detail with you.

Infraco recognises that due to the time constraints placed upon it and it's Sub Contractors, with regard to the Project Carlisle pricing effort, that the prices provided have not been fully reviewed and it would be reasonable to expect that the Sub Contractor prices may be able to be reduced after further discussion. Infraco would be happy to work with you to achieve this aim.

The Guaranteed Maximum Price, as developed and pertaining to the attached scope and Programme is outlined in the attached Proposal. For the avoidance of doubt this Proposal relates solely to the scope and corresponding programme of the Project Carlisle initiative and to that extent shall supersede all estimates and proposals provided in relation with the Edinburgh Tram Network (ETN) once implemented by a tie Change Order.

This proposal is submitted without prejudice to Infraco's whole rights and remedies and no party may rely on any statement, declaration or representation contained within this proposal, whether express or implied, in any court proceedings, arbitration, adjudication, mediation or other form of determination or negotiation without the express written consent of Infraco. This proposal shall not constitute an offer or create any legally binding obligation on Infraco.

As always, we will avail ourselves to meet at your convenience to discuss this Proposal.

Yours faithfully,

M Foerder
Project Director
Bilfinger Berger Siemens CAF Consortium

PREFACE

Through an iterative and joint process, under an initiative known as “Project Carlisle”, tie has resolved to utilise the public purse to obtain “best value” to construct a reduced scope of the Infraco. To this extent, Infraco has developed this Guaranteed Maximum Price Proposal based upon its assumed scope and programme that it believes is both comprehensive and achievable.

The purpose of Project Carlisle is to set aside existing contractual problems by allowing the Parties to agree an amicable solution which will permit the Project to move forward for the benefit of the City. The key to the success of this initiative will be a forward looking perspective and a commitment by both Parties to work in mutual co-operation to fulfil their agreed roles and responsibilities, and agreement to minimise the escalation of any dispute beyond the Senior Representatives of each of the Parties.

Infraco recognises that tie is in the process of drafting a Change Order to execute the Project Carlisle initiative therefore the purpose of this Proposal is to identify the requirements necessary to incorporate this initiative into the Infraco Contract.

Infraco commits to work with tie to expeditiously develop the output of the Project Carlisle Change Order to reflect the final negotiated terms. However, in view of the adoption of Project Carlisle and the Guaranteed Maximum Price, we believe Provisional Sums, Value Engineering, Incentivisation, and terms regarding Uninsured Economic Losses, included in the Infraco Contract, would no longer be applicable or appropriate.

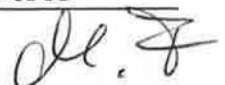

We would welcome further discussion with you on these areas as well as the various other terms of the Infraco Contract which we believe will require to be reviewed. We would expect such discussions to extend to the performance security package, and a simplified, effective and efficient, Change mechanism to facilitate the uninterrupted progression of the Infraco Works.

As part of Project Carlisle, Infraco is committed to providing a fully functional tram system. We appreciate that this will not be possible without a Terminus at a suitable location, however, at this stage Infraco does not have sufficient information to provide a Guaranteed Maximum Price for works between the Terminal Point and Terminus. As such this proposal does not include works east of the Terminal Point. Both civil and systems works have been excluded from this proposal for the following issues:

1. Agreement on the location of a Terminus
2. System functionality and /or reliability
3. Contract conditions for the works to be performed east of the Terminal Point
4. Modification of the Infraco Contract with regard to risk allocation, warranties, indemnities, and performance security in relation to tie’s executions and management of the civil work.

Once we have an understanding of tie’s proposed arrangements for execution of the civil works east of Princes Street and how the interface with systems and trackwork for this section will be managed we will be better able to provide a Guaranteed Maximum Price for Terminal Point to the Terminus. The preferred solution is for BSC to undertake the civil works east of Princes Street and we invite tie’s constructive response to this proposal.

For the avoidance of doubt this Proposal relates solely to the scope and corresponding programme of the Project Carlisle initiative and to that extent shall supersede all estimates and proposals provided in relation with the Edinburgh Tram Network (ETN) once implemented by a tie Change Order. This proposal is submitted without prejudice to Infraco’s whole rights and

remedies and no party may to rely on any statement, declaration or representation contained within this proposal, whether express or implied, in any court proceedings, arbitration, adjudication, mediation or other form of determination or negotiation without the express written content of Infracore. This proposal shall not constitute an offer or create any legally binding obligation on Infracore.

A handwritten signature in black ink, appearing to be 'J. F.', is written over the page number.

EXECUTIVE SUMMARY

Introduction

Further to your request, we are pleased to enclose our proposal to carry out the Infraco Works within the existing Infraco Contract, as modified under the Project Carlisle initiative.

The Scope

We have prepared our proposal based on the scope set out in this Proposal. In essence, we will carry out the works shown on the GMP Drawings, which offer a buildable design meeting the Project's aspirations.

Given that the design is now in an advanced state, we would expect that any future changes to design will be minimal. We believe that our proposal in this regard will help to remove some of the obstacles which have hampered progress of the Project to date.

Our Pricing Assumptions

As a result of the above, we are able to offer our Guaranteed Maximum Price on the basis of a minimal number of Pricing Assumptions. We would like to take this opportunity to assure you that we have looked to minimise the number of Pricing Assumptions to provide greater certainty to both Parties and for the benefit of the Project as a whole.

A shortened list of Pricing Assumptions can be found at Appendix 4. The main items be summarised as follows:

1. Infraco will build to the GMP Drawings. The GMP Drawings will not be amended other than by way of a tie Change
2. CEC will approve the GMP Drawings in expedient fashion.
3. Infraco will not take the risk of dealing with contaminated ground (including by invasive species)
4. Infraco will not take any risk associated with the discovery and/or replacement of utilities
5. Infraco has accepted the risk to remove and replace soft materials to the extent identified on the GMP Drawings
6. Infraco will not take the risk on obstructions or voids being discovered below the original ground level
7. Infraco and tie shall agree a revised Milestone Payment Schedule acceptable to both Parties
8. CEC will grant all consents and technical approvals for the Integrated Trackform design shown on the GMP Drawings
9. No work will be carried out beyond the Terminal Point.

In addition we anticipate that the majority of the existing Pricing Assumptions will no longer be required. Those remaining are of a less contentious nature than the existing design related ones eg. PA 33 which provides that third parties shall not carry out works which impact upon the

Infraco Works. Pricing Assumptions such as 3.4.1 which have been more problematic to date would be removed. We look forward to discussing this with you.

The Programme

Our proposed Programme is set out at Appendix 5. This shows Sectional Completion Dates of:

1. Section A – 24 May 2011
2. Section B – 15 September 2011
3. Section C – End of construction 22 May 2012 - End of Testing & Commissioning 20 August 2012
4. Section D – 19 November 2012

The Programme which was exclusively set up for the implementation of Project Carlisle is challenging but achievable and Infraco is fully committed to delivering it.

The Guaranteed Maximum Price

In light of the above, we are able to offer a 'Guaranteed Maximum Price' of £433,290,156 and €5,829,805, less amounts previously paid. We believe this is a fair and reasonable offer which we hope, when seen as part of this Proposal, will prove acceptable to tie.

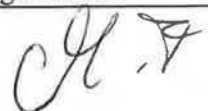

A detailed breakdown is provided at Appendix 1.

Revised tie Change Mechanism

We believe that Project Carlisle offers an excellent opportunity to remedy what has previously been a major source of contention on the Project - namely Clause 80. Our proposal will commit Infraco to working whilst Estimates are agreed subject to payment being received for works carried out during that period.

The revised mechanism would operate as follows:

1. tie will be required to issue a tie Notice of Change upon the occurrence of a change event, or upon Infraco notifying it of such an occurrence.
2. Failure to issue a tie Notice of Change will result in the matter being referred to DRP.
3. Infraco to prepare an Estimate within existing contractual timescales, following receipt of a tie Notice of Change.
4. A finite period to be allowed for agreement of the Estimate failing which the matter will be referred to DRP.
5. Infraco will commit to carrying out the works associated with the tie Change in advance of agreement or determination of the Estimate, and where necessary, in advance of the production of an Estimate in accordance with the Programme.
6. Infraco to be paid, on an interim basis in line with the Estimate.
7. Note that as set out above, Infraco will continue to build the design set out in the GMP Drawings until it receives a tie Notice of Change instructing otherwise.

It is our firm belief that the above changes offer an equitable solution for both Parties, allowing uninterrupted progress of the Works to continue and a swifter delivery of the ETN.

Priority of Project Carlisle

Given the innovative nature of Project Carlisle and the impact of our Proposal on the existing Infraco Contract, both Parties would be required to accept that the product of this Proposal will take precedence over any conflicting existing Infraco Contract obligation.

Conclusion

We believe that our proposal provides an excellent opportunity for both sides to move forward in a positive direction. The key aspects of our proposal can be summarised as follows:

1. A Guaranteed Maximum Price based on a well-developed design
2. A fully optimised Programme providing the most sensible and expedient method of delivering the Project
3. A significantly reduced number of Pricing Assumptions
4. A simplified Change mechanism which allows progress to continue while Clause 80 runs its course.

Whilst we anticipate that much time and work will be required to align the Infraco Contract with the changes brought about by Project Carlisle, not least to the Employer's Requirements and Infraco Proposals, there is an immediate need to resolve outstanding issues relating to the approval of form to Sub Contract for key Sub-Contractors and the Permits to Commence work in order to demonstrate the benefit of Project Carlisle to the general public.

We also believe that the success of the Project could be ensured by the appointment of a full time mediator to resolve differences, and continually engage both Parties in constructive dialogue.

We look forward to discussing the Proposal in further detail with you in the coming weeks and hope that a satisfactory outcome can be achieved for both Parties.

DEFINITIONS USED IN THIS PROPOSAL

"Project Carlisle Change Order" for the purposes of this Proposal refers to the issue by tie of a Change Order to incorporate the 'Project Carlisle' initiative.

"GMP Drawings" means the GMP Drawings, Specifications and Schedules, listed in Appendix 3 of this Proposal.

"Guaranteed Maximum Price" means, on the basis of the scope and assumptions referenced in this Proposal, the sum set out in Appendix 1 as the same may be varied in accordance with the principles set out in this Proposal and the remaining terms of the Infraco Contract.

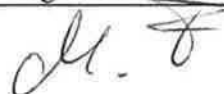

"Actual Cost" means all direct and indirect cost/expenditure incurred whether on or off Site including overheads, finance, and other charges and allowances allocable thereto.

"Estimated Actual Cost" means, a reasonable estimate of Actual Costs, based upon the available information, terms, and conditions known at the time of estimation. It is anticipated that Estimated Costs may vary from the Actual Costs.

"Programme" means the Programmes contained in Appendix 5

"Terminal Point" is defined at the East end of Princes Street (Inbound track Chainage 121382 and Outbound Chainage 121377)

"Terminus" is the location required to reverse trams for the proposed service operation.

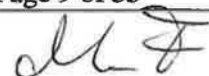

APPENDIX 1

GUARANTEED MAXIMUM PRICE

The Guaranteed Maximum Price is comprised of the following Infraco Prices (further detailed in Appendix 1.1 – 1.4 respectively), exclusive of Value Added Tax and in Pounds Sterling:

Bilfinger Berger Civil UK Ltd.	£234,331,022
Siemens	£126,901,621
CAF	£55,781,634
and	€5,829,805
<u>SDS*</u>	<u>£16,275,879</u>
Total	£433,290,156
and	€5,829,805

***SDS GMP Price is included in Bilfinger Berger UK Ltd. Price, however it is broken out for presentation purposes.**

APPENDIX 1.1

APPENDIX 1.3

CAF - Guaranteed Maximum Price Breakdown

See Attached Supplemental Information CD:

Appendix 1.3-:CAF GMP Breakdown

Note: The CAF GMP is based on GBP and Euro values.

A handwritten signature in black ink, appearing to be 'D. F.', is located in the bottom right corner of the page.

CAF cost associated with Project Carlisle

Assumptions:

- The Delay Costs below are generated by delays incurred by the project and formalized with Project Carlisle. They include the claims presently held by CAF for other delay claims (MUDFA, ETN, etc.). There would be no double recovery, so if Project Carlisle would be retained by Tie, the other claims for delay generated costs would be settled with these amounts.
- To obtain the total amount that would be due to CAF, we add two components: Delay Costs, as explained above, and normal Contractual Payments pending as of 23 July 2010 (certified milestones or not, all payments until completion of TSA).
- CAF has assumed Tie will continue to pay Tram Delivery Milestones as it is doing today. CAF has assumed the Commissioning Milestones will not be paid until the infrastructure allows Commissioning tests to occur, and therefore they will be delayed, incurring Delay Costs.
- CAF has analyzed the Infrastructure availability during the Commissioning, and presently understands that the rate in the Contractual Programme (three trams per month commissioned) cannot be sustained under the precarious conditions associated with Infrastructure availability at the first stages of Project Carlisle. We understand that the rate must be a maximum of 2 tramways per month, and the Programme would need to be updated to reflect that rate. Nevertheless we estimate that enough trams can be commissioned so no delay is introduced in the start of service for that reason. As required by the Consortium in P. Carlisle, these delays in tram commissioning should not generate LDs to CAF (as the tramways are being delivered to date and are available for commissioning as contractually required).
- The cost of the maintenance of tramways will decrease due to less kilometres of service per year, while the line is not completed. We estimate the number of kilometres will amount to a quantity smaller than what is foreseen in the TMA, and therefore needs to be agreed, logically the cost per kilometre will be higher than the costs agreed, although the total Maintenance Cost according to the TMA will be smaller. CAF has not the information to estimate that TMA price reduction (year – kms targeted by Tie under P. Carlisle), and it is not included in the amounts below.
- The Delay costs have been estimated according to the Programme Project Carlisle Revision 00, (100729).

Delay costs:

OVERALL COST	COSTS

APPENDIX 2

VALUATION OF TIE CHANGES AND PROLONGATION

1 TIE CHANGES

- 1.1 We propose that amendments to the existing Schedule Part 4 Appendix G would be appropriate to simplify the rules concerning valuation of tie Changes and to establish rates for valuation of prolongation.
- 1.2 The valuation of any tie Change will continue to be made in accordance with Clause 80.6.
- 1.3 Where Clause 80.6.3 and/or 80.6.4 applies and to the extent that they apply to a tie Change then the valuation shall be on the basis of Actual Cost or Estimated Actual Cost.
- 1.4 In respect of a valuation of any work under 1.3 above the tie Representative shall apply head office overheads and profit percentages to the appropriate elements of Actual Cost or estimated Actual Cost as follows:

(a)	Civil Engineering works	10%
(b)	Systems and Track works	17%

- 1.5 In all cases where a tie Change is being valued in accordance with Clause 80.6, Site related overhead (Preliminaries) shall be valued and added as follows:

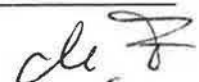

7.4% to be added to the net valuation of the tie Change to cover the Consortium Preliminaries.

17.5% to be added to the net valuation of the tie Change to cover any other Preliminaries with regard to any tie Change associated with Civil Engineering Works, provided that this calculation shall in no case apply to Systems and Trackwork or claims for other Preliminaries in relation to prolongation costs arising from extensions of time or delay.

Site related overhead (Preliminaries) in respect of Systems and Trackwork and in respect of Tram Supply Obligations shall be valued in accordance with paragraph 2 (Prolongation) below.

2 PROLONGATION

- 2.1 Infraco acknowledges that the principle of valuation of prolongation costs arising from extensions of time granted has been established through the mediation process leading to agreement of the Estimate for Infraco Notification of tie Change number 1. tie Change Order number 116 reflects the basis of this agreement. Infraco proposes that:
- (a) Prolongation costs including Preliminaries elements relating to Systems and Trackwork shall be based on Actual Cost or Estimated Actual Cost of the resources and/or labour employed by Infraco or its sub-contractors.
- (b) In respect of the valuation of cost elements relating to Systems and Trackworks, 17% is to be added to the Actual Cost or Estimated Actual Costs in respect of related head office overheads and profit percentages.

- (c) Preliminaries elements in relation to prolongation costs which relate to Civil Engineering Works arising from extensions of time or delay, valued in accordance with the rates set out in Appendix 2.1 hereto.
- (d) In all cases where prolongation is being valued in accordance with Clause 80.6 costs which relate to the Tram Supply Obligations shall be valued on the basis of Actual Cost or estimated Actual Cost.

APPENDIX 4

PROJECT CARLISLE SCOPE

The design, construction, installation, commissioning, tram procurement and supply, system integration, infrastructure maintenance, tram maintenance and supply of related equipment, spares and materials, warranties, information, licences and related infrastructure in respect of those parts of the Edinburgh Tram Network as defined in this Proposal:

Off-Street Works to the following Sections from Haymarket to Edinburgh Airport:

1. Section 2A – Haymarket to Roseburn Junction;
2. Section 5A – Roseburn Junction to Balgreen;
3. Section 5B – Balgreen to Edinburgh Park Central;
4. Section 5C – Edinburgh Park Central to Gogar;
5. Section 6 – Gogar Depot;
6. Section 7A – Gogar to Edinburgh Airport.

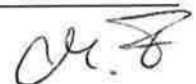

On-Street Works to the following Sections from Haymarket to Princes Street East:

1. Section 1D – Princes Street West to Haymarket;
2. Princes Street West to the east end of Princes Street East (i.e. Terminal Point).

Enabling Works in Section 1A are as follows and as detailed in the electronic record of “GMP Drawings”

1. Newhaven Tramstop to Retaining Wall 1A – fill to underside of trackslab;
2. Lindsay Road Retaining Walls 1A, 1B, 1C and 1D – design and construction;
3. Lindsay Road Link Road to Ocean Drive – removal of retaining wall and footpath, removal of trees and ground preparation, placing of earthworks fill and re-grading of profile;
4. Lindsay Road – lowering works;
5. Tower Place Bridge – works to be completed, including the final roadway and the track as per shallow track design completed by SDS;

N.B. No systems-related works required.

In General

The Guaranteed Maximum Price is for the construction and delivery of the design shown on the drawings, specifications, schedules and submissions contained in the electronic record of "GMP Drawings". Changes in Procurement Laws, Tax Rates, Design Standards or Specifications, or changes in the Code of Construction Practice shall be considered a tie Change.

For the avoidance of doubt and further reference below to the Guaranteed Maximum Price being based on the GMP Drawings in the individual localities, is simply for added emphasis. Infraco shall not be obliged to build anything other than the design shown in the GMP Drawings unless instructed otherwise by tie through a tie Change Order, or as negotiated between the Parties.

Roseburn Viaduct

The Guaranteed Maximum Price is based on the drawings, specifications and schedules contained in the electronic record of "GMP Drawings".

Gogarburn Landfill Site (Section 7A)

The Guaranteed Maximum Price is based on tie's recommendation, which is included in the electronic record of "GMP Drawings", which amends trackform to ballast and includes a track retaining structure in the vicinity of the 50m radius curve to the east of Gogarburn Bridge and an element of earth retention. The GMP Programme assumes that a maximum three month surcharge period is required and that access will thereafter be available to Infraco in accordance with its the GMP Programme.

Outstanding Approvals etc.

Consents from Third Parties, in so far as it is required to obtain agreement of approval, have been identified when possible in the Programme. In the event other Consents or Third Party Approvals are required they shall be procured by tie in accordance with the GMP Programme, and in the event of a delay or additional cost Infraco shall be compensated by tie Change Order.

Trackform Type Confirmation

The trackform type at each location is based on the actual design as defined in the electronic record of "GMP Drawings" (SPM-TRW-GEN-0018)

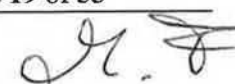

Murrayfield Stadium Accommodation Works

These works are being carried out by others with an expected completion date of 31 October 2010. The GMP Programme is based upon this completion date and assumes that access will be available thereafter in accordance with the GMP Programme.

South Gyle Access Bridge – sewer clash at [Structure Number 26]

The sewer is being diverted by others with an expected completion date of 31 October 2010. The GMP Programme is based upon this completion date and assumes that access will be available thereafter in accordance with the GMP Programme.

The Guaranteed Maximum Price will be based on the Drawings as included in the electronic record of "GMP Drawings".

Gogar Interchange

The Guaranteed Maximum Price does not include for the Gogar Interchange. The Guaranteed Maximum Price is based on the GMP Drawings.

New Ingliston Limited ('NIL')

The Guaranteed Maximum Price is based on the Drawings as included in the electronic record of "GMP Drawings".

Airport Retaining Walls W14 & W15

The Guaranteed Maximum Price is based on the Drawings as included in the electronic record of "GMP Drawings". Any changes required to accommodate the outcome of the flood modelling works are not at the risk of Infraco save for alterations required to the weir within Culvert No.3.

Airport Kiosk Design

No further future proofing is allowed in the Guaranteed Maximum Price.

The Guaranteed Maximum Price is based on the current developed elliptical design which is included on the drawings as included in the electronic record of "GMP Drawings".

Tramstop Design

The Guaranteed Maximum Price is based on the Drawings as included in the electronic record of "GMP Drawings".

Substation Design

The Guaranteed Maximum Price is based on the Drawings as included in the electronic record of "GMP Drawings".

Protection of Services

The protection and support of services are excluded from the Guaranteed Maximum Price.

Landscaping

In respect of landscaping works, Infraco shall be deemed to have met all requirements relevant to landscaping which are necessary to enable the issue of a Certificate of Sectional Completion provided that the only outstanding works relate to planting. Infraco shall then carry out the planting works at the beginning of the next planting season.

Section 2A at Haymarket: Phase 1a/1b Interface Design

The Guaranteed Maximum Price is based on the Drawings as included in the electronic record of "GMP Drawings". The Guaranteed Maximum Price does not include any work within Section 3A as part of Phase 1a or Phase 1b.
