Scott

Further to our discussion I enclose the query received from BBS in respect of the indicative roads and pavings drawings you have provided. Whilst I appreciate that you may not be able to provide all of the answers to the questions they raise I'm sure you are in a position to better inform BBS (and me) of the intent of the design in terms of levels in the key areas, particularly in respect of levels. I think it would be helpful if you could bring your roads and track designer to the meeting.

We are proposing to set up a meeting between yourselves and ourselves next week based around your availability - Monday am, Tuesday after 2pm, Wednesday am, Thursday all day, Friday outside 10 - 1pm period.

Steve suggested I deal direct with you on this rather than go through intermediaries. I would like to discuss the query in more detail with you prior to the meeting to agree what can be provided.

Regards

Geoff Gilbert - Project Commercial Director
