Date: 21 January 13

Dear Sirs,

**Edinburgh Tram Network
Lead Replacement**

We refer to your letter reference's N348, N351 and most recently N363 of 28th November 2012. We enclose our email of 21st November 2012 which details our response to your letter references N348 and N351.

We record the issue of lead replacement is now being discussed between CEC and SW and we await an agreed position on this issue. We note this was agreed between the parties at our KI review meeting on 5th December 2012.

Yours faithfully

Rob Leech

Date:

Dear Sirs,

**The Edinburgh Tram Project
Lead Replacement: Legal Obligation to Replace to Property Boundary**

We refer to your letter references N348 and N351.

We note your letters detail SW's obligation regarding the opportunistic renewal of lead service pipes.

We have reviewed the scope of the Advance Diversion Works in terms of the Tripartite Agreement and the works specification (IFC drawings and schedules) and cannot find any agreement between the parties for CEC to carry out lead renewal works at its expense. We note the measures required to be taken, with respect to Scottish Water's apparatus as a consequence of the Edinburgh Tram Project (major transport works), relate to the diversion of water mains and not to the upgrading of service connection pipes from lead to PE.

We request that SW review and confirm where CEC are obliged/have agreed to carry out lead renewal works to the property boundary at its expense.

Yours faithfully

Julian Weatherley
Project Director – Edinburgh Tram
