Trudi

I have not really been involved in the general development of the protocols - this has been Barry and Douglas (with a bit of Ray maybe?). My involvement has been limited to developing the 4 land protocols with Ray and the achingly frustrating process of trying to get these signed off by CEC. We're meeting Bill Miller tomorrow (Tuesday) afternoon and will be discussing these protocols, so I'd like to discuss this general confusion prior to that. Ray will be in to see me 10-12 tomorrow - perhaps we could see you and Douglas around 12.00?

Geoff

Douglas/Geoff

I have had a brief discussion with Duncan today regarding the protocols with CEC. I think there may be some confusion regarding the status of the protocols. I'm also concerned that there are gaps/approval processes which are not yet covered by the protocols especially in relation to the procurement process.

I think you have both been involved in the protocol process - can you both confirm your understanding of the status of the protocols and let me have the latest version of all the protocols.

Thanks  
Trudi
