For the attention of Steven Bell, Project Director

Dear Sirs,

**Edinburgh Tram Network Infraco
Base Date Design Information – Civil Works**

We refer to your letter dated 28th October 2008, ref INF CORR 277.

You state in this letter that "tie does not consider that there is an ambiguity or discrepancy as to what 'Base Date Design Information' comprises in terms of the Infraco Contract" and yet, despite Infraco providing a list of what we believe to be the Base Date Design Information, we have never been in receipt of an alternative list.

We have therefore attached a comprehensive list of all 4,926 documents issued to us prior to the 25th November which you correctly state represent the Base Date Design Information as detailed under the Contract. We summarise these documents as follows:

- Phase 1B Documents – 974
- Duplicate or Previous Revisions of Documents – 859
- Ground Condition Documents – 519 (included in Schedule 41)
- Other Documents – 2,574

To ensure clarity, Infraco proposed 1,259 of the 2,574 'Other Documents' as the Base Date Information as this is what was used to produce the tender price in accordance with the Employers Requirements.

Infraco accepts that the contract does state the Base Date Design Information to be 'all design Information drawings issued to Infraco up to and including 25th November 2007' which would include all the drawings contained within the 2,574 documents. The resulting lists of 1,259 Infraco Proposal Drawings, 491 Other Drawings and 519 Schedule 41 Drawings are attached to this letter.

Please confirm that you accept that the appended lists represent the Base Date Design Information.

Yours faithfully,

C H B Brady
Project Director
