Not really, but I will do something about ensuring Mr Bissett is not on the distribution list again.

Seriously, I will work up something for your review later today.

That was about process, but I would like to discuss the information we will have for our review, whatever form it takes.

I hadn't seen this report before, nor necessarily should have, but I do think the reporting here and in the TPB papers (which I assume is the TS Report) is not sufficiently detailed to disclose the vital signs. For example, the Committee Report says we are nearly 40% behind on physical progress, but there is nothing I can see which relates this in a rationalized way to the commentary that programme is 6 weeks behind and will have just two weeks Infraco impact ; nor is there a cum cost versus related budget analysis which should relate to the physical progress and programme.

If our exec review is to do more than simply ask SB for verbal comfort, we may need better metrics.

Regards

Graeme

Gents,

I have just reviewed this report. It worries me that all is not well. You would never have picked this up from the TPB formal report, there are issues all over the place. Can you please advise I and my tie Exec e would get at this level of detail and challenge in the framework we discussed this morning, I am still convinced that we need a more detailed, focused, commercial session.

Willie
