Subject: Tie - Edinburgh Trams

Dear all - we met on Monday of last week and discussed the current status of the project. The meeting raised a number of significant issues resting with various stakeholders / sponsors etc. We thought it best to try and collate some of these and, provide thoughts and actions that could benefit the parties going forward.

It may be worth meeting again to run through these and work out how they are presented - some, you may have different views on etc. It is probably fair to say that sharing these requirements / views / actions with Tie and CEC could put the cat amongst the pigeons!.

John - very happy for you to send this to your advisers (KPMG) if you are happy with the content (but obviously on a confidential basis)

Regards
Ben
