### 1.0 INTRODUCTION

This report builds on the SRO Project Delivery Plans for 2011, 2012, 2013 and June to December 2013.

This document is written as the final Delivery Plan of the series within the project.

### 2.0 PRÉCIS OF PROGRESS TO DATE

With the benefit of cooperation and agreement between the Contractors and CEC, the project overall is ahead of the Contract Programme, with the inclusion of a new beneficial work section that was handed over to the Client on 20th December 2013, Section B1.

Trams have been gauge tested between the Airport and York Place; this testing having commenced on 4th December 2013.

Notional Final Accounts have been agreed through Infraco with their main sub contractors, Crummock and Lagan. The main utilities contractor final account is also agreed.

2013 called for a team structure change on two occasions to man mark and resource the project requirements. This led to the introduction of a Tram Transition Board, which includes CEC and Edinburgh Trams representation. As proposed in the 2013 Delivery Plan, this replaced the weekly Tram meeting at 8.00am on Thursdays.

Again per the 2013 Delivery Plan, the Ready for Operations forum changed format, with concentration on technical matters reducing the need for the level of Lothian Buses attendance.

Elsewhere, in order to meet the Client Target Programme of having a "ROGs Keeper" by September 2013, a Lothian Buses, Edinburgh Trams, CEC Operating Contract workstream was initiated. The Operating Contract workstream delivered the report to Council by August 2013 in time for Keeper designation in September 2013.

A Testing and Commissioning control meeting was formed and in particular the interdependencies were highlighted at a "fear and failures" meeting chaired by CEC.

The project instigated "blue light" liaison meetings in 2013, which will run until the trams are operational.

Demobilisation continues with a further push to reduce costs on all fronts during the first quarter of 2014.

The importance of the Edinburgh Trams staff resource and competent safety management plans were progress chased with support from Edinburgh Trams and this aspect will become even more important in the lead up to revenue service in Spring 2014.

To protect the CEC tram asset and ensure safe trackside working, the CEC tram unit has been formed, led by Bob McCafferty.

# Edinburgh Trams Project Delivery Plan for 2014

Confidential & Legally Privileged - FOI(S)A Exempt

The 22 week time bank was expended, delivering protection for the Client from prolongation cost.

To meet the challenges of the next five months, the Delivery Plan key recommendations for 2014 include:

- Further revision of the governance structure and meeting cycle;
- Maintenance of a single voice and control of the Tram technical and performance message from the Tram SMT;
- Continuing support to Edinburgh Trams and meshing of requirements between Infraco, CAF and Edinburgh Trams, while coupling with CEC and TFE directives;
- Driving demobilisation of construction team; and
- Legacy file and handover of as built information.

### 3.0 COMMUNICATION AND MEDIA

Progress has been made in the following areas:

- · Management of emerging issues and engaging partners appropriately;
- Ensuring that important information is released in advance of key events;
- Engaging both the Transport Convener and Transport Minister appropriately in media announcements/events;
- Improved working arrangements with Edinburgh Trams and Lothian Buses;
- Maintaining working arrangements with contractors; and
- Improved presentation of information on the website.

The Comms team continue to uphold the governance communications control meeting and project communications protocols agreed at mediation. It is important that this is maintained.

The stakeholder and communications teams have been reduced in size since the project became "street clear" in October 2013. Likewise the logistics support was stood down at that time.

Enquiries and Complaints – A single portal manages all enquiries, including FOI requests, telephone calls and emails. All enquiries are logged and retained in a single library, maintained by Comms. FOI requests continue to be signed off by the SRO.

### 3.0 COMMUNICATION AND MEDIA CONT'D

Looking ahead to Spring 2014, a closely controlled message requires to be fashioned to ensure clarity of understanding regarding the completion of testing and commissioning, commencement of shadow running and the launch of revenue service after receipt of the "letter of no objection" declaring the competency of the infrastructure and that of the Operator, NB. these are two separate achievements.

In 2014 it is essential that an emphasis towards the benefits of the tram system is developed, aimed at turning short term concerns to mid to long term enhancement for the city and those who live, work and visit Edinburgh. The Comms Engagement team will lead on and support this change of emphasis.

Links with relevant Community Councils have been maintained to provide updated progress information and to work on a specific agenda agreed with each group.

## 4.0 PROGRAMME

2014 will bring a continuation of working with Infraco in order to understand the emerging issues that may affect the contract programme.

In addition, the composite project programme, i.e. "the Client Target Programme" (see Appendix I), continues to be managed by CEC with support from Edinburgh Trams, CAF and Infraco.

The Client Target Programme is composed of the contract programme, CAF's programme and Edinburgh Trams' ready for operations programme.

In November 2012 the signing of a confidentiality agreement with Infraco permitted the creation of a CEC/Infraco programme forum.

Opportunities will continue to be sought within the CEC Infraco Programme Forum to bring forward the end dates for Infraco, CAF and Edinburgh Trams as far as practical and safe.

## 5.0 GO LIVE DATE - FACTORS FOR CONSIDERATION

Factors to be considered in arriving at a go live date are as follows:

- Have Operator ready in advance of potential go live date and signed off by the ICP as competent and create contingency for any further ICP requirements
- Emergency Services Trained and coordinated
- Emergency Planning exercises completed
- Trams de-bugged and ready for services in advance of potential go live date
- Controls, infrastructure and track snag free and signed off the by ICP

Project: Reference

Confidential & Legally Privileged - FOI(S)A Exempt

### 5.0 GO LIVE DATE - FACTORS FOR CONSIDERATION CONT'D

Advance warning to the Public and confirmation of commercial readiness by Transport for Edinburgh (i.e. fares agreed, launch/media event).

### 6.0 **DEMOBILISATION AND RESOURCE PROFILE**

The project passed its peak point in resources in late 2012.

2012 saw the last major utilities being cleared with track and structures complete in 2013.

In order to secure best value, the project resources should be kept to only those required at any given time.

The Torphichen Street offices are cleared, with the exception of two rooms used by Siemens and the site establishment at Lochside is targeted for disposal to CEC for £1 in Summer 2014.

Turner & Townsend is being further stood down by 17th January and targeted to be a two person handover team by the end of February 2014.

### 7.0 **SURPLUS TRAMS**

To ensure maximum value and use, all 27 trams should be utilised in rotation following industry best practice.

Notwithstanding, any opportunity to dispose of surplus trams continues to be examined.

### 8.0 THIRD PARTY AGREEMENTS

A copy of the Third Party Agreements position as at 3rd December 2012 is attached (see Appendix II).

A target for this work to be complete by 31st March 2013 was set in December 2012; this has not been achieved. To that end, a more detailed tracker has been prepared and direct management of the file has been passed to the project SRO. Additional resource was requested and is being provided by CEC legal to initiate a legal chaser.

A weekly progress meeting will be instigated with effect from January 2014 and a tracker formed to manage the process. A copy of the issues as reported in December 2013 is attached.

Agreements have been reached with Scottish Water and are progressing to Legal Agreements. Similarly with Network Rail.

### 9.0 CONTROL MEETINGS

Since mediation in March 2011, the use of the agreed governance structure and the use of control meetings have ensured that the project owner, the CEC Chief Executive, has been able to direct the client side to match commitments made to Infraco and CAF at mediation.

It is recommended that the platform of control remains, albeit in a further revision to suit this stage of the project. The proposed revision for 2014 takes cognisance of the input from Transport for Edinburgh and Edinburgh Trams.

As before, the Project SRO will continue to attend all control and valuation meetings as noted overleaf, reporting back to the CEC Chief Executive.

Reports to the Governance, Risk and Best Value, the All Party Oversight Group and the Transport Convener will continue as before.

A fundamental revision proposed in the forthcoming period is to revisit the purpose, attendees and reporting to the Tuesday Tram SMT and the Thursday Tram SMT (Transition Board) – see Appendix III.

It is proposed that the attendees at a now fortnightly Tuesday Tram SMT (Owners meeting) will be Sue Bruce (Chair), Ian Craig, Mark Turley, Tom Norris, Alan Coyle, Colin Smith and Ainslie McLaughlin. The minute of that meeting will be issued to the Transport Convener as a joint briefing note from CEC, TFE and ET. The agenda will be set to cover high level discussion on project threats, communications, finance, programme opportunities and the revenue commencement date.

The Thursday Tram SMT (Transition Board meeting) will remain weekly with attendees being Mark Turley (Chair), John Bury (Vice Chair), Tom Norris, Bob McCafferty, Alan Coyle, Gareth Jones, Alasdair Sim and Colin Smith. The minutes of this meeting will be circulated to the Owners meeting attendees and will cover:

- (I) Health and Safety
- (2) SRO's report, which will include as before (a) Testing and Commissioning, (b) Client Target Programme (see attached), (c) the Independent Competent Person's key concerns, (d) Risk (see attached), (e) Section C completion issues, (f) Requests for Information reporting, etc. from other CEC departments or agencies, (g) Third Party Agreements, and (h) AOB. (see Appendix IV)
- (3) General Manager's Report covering (a) Procedure Development Plan (see attached), (b) Resources, (c) Risk, (d) Items of non acceptance of use and (e) R&T SPI TP schedule (see attached - Appendix V).
- (4) CEC Tram Unit Manager's Report, ID 38 Top 40 checklist (see attached Appendix VI).

In addition, Ian Craig, Tom Norris and Colin Smith are to have a fortnightly liaison meeting prior to the CICM in the intervening week between the Tuesday Tram SMT (Owners meeting) with Tom Norris and Colin Smith meeting weekly prior to the CICM meeting.

• EDINBURGH COUNCIL

Confidential & Legally Privileged - FOI(S)A Exempt

### 10.0 FUTURE DEVELOPMENTS

This section was first reported in December 2012, remains valid and is re-presented.

The tram line when operating will increase footfall on its line boundary, this will have a positive effect on values and opportunities.

Consideration should be given to a strategic property/site development strategy in order to stimulate and lever value for CEC adjacent assets.

The view of strategic partners such as Forth Ports and Edinburgh Airport should be sought.

In addition, the tram corridor should be protected through Planning, Building Control and Roads to ensure no future overbuild to protect the Tram Act Red Line boundary.

### 11.0 KNOWLEDGE LEGACY

This section was first reported in December 2012, remains valid and is re-presented.

As the project heads to completion, consideration should be given to retention and redeployment of knowledge rich personnel who have worked on the tram project, e.g. the CEC Tram Unit.

As personnel leave confidentiality agreements should be enacted to protect the integrity of any future public inquiry.

Preparation of a lessons learned ledger, to be retained by the Council, should be initiated.

### 12.0 FORENSIC FILE

This section was first reported in December 2012, remains valid and is re-presented.

Confirmation should be given that a full library has been retained by way of a forensic file that may be used should a public inquiry be called.

### 13.0 OPPORTUNITIES

### 13.1 Wi-Fi on Trams

The Project is now moving through OJEU procurement and tender process, having received initial funding board approval.

## 13.2 Edinburgh Airport

A Lothian Buses, CEC, Edinburgh Trams team of Bill Campbell, Tom Norris and Colin Smith is negotiating media and car park opportunities, as per the Council report attached (see Appendix VII).

## 13.3 Freight Tram

Atkins report is due to be received in January 2014.

## 13.4 E-Commerce

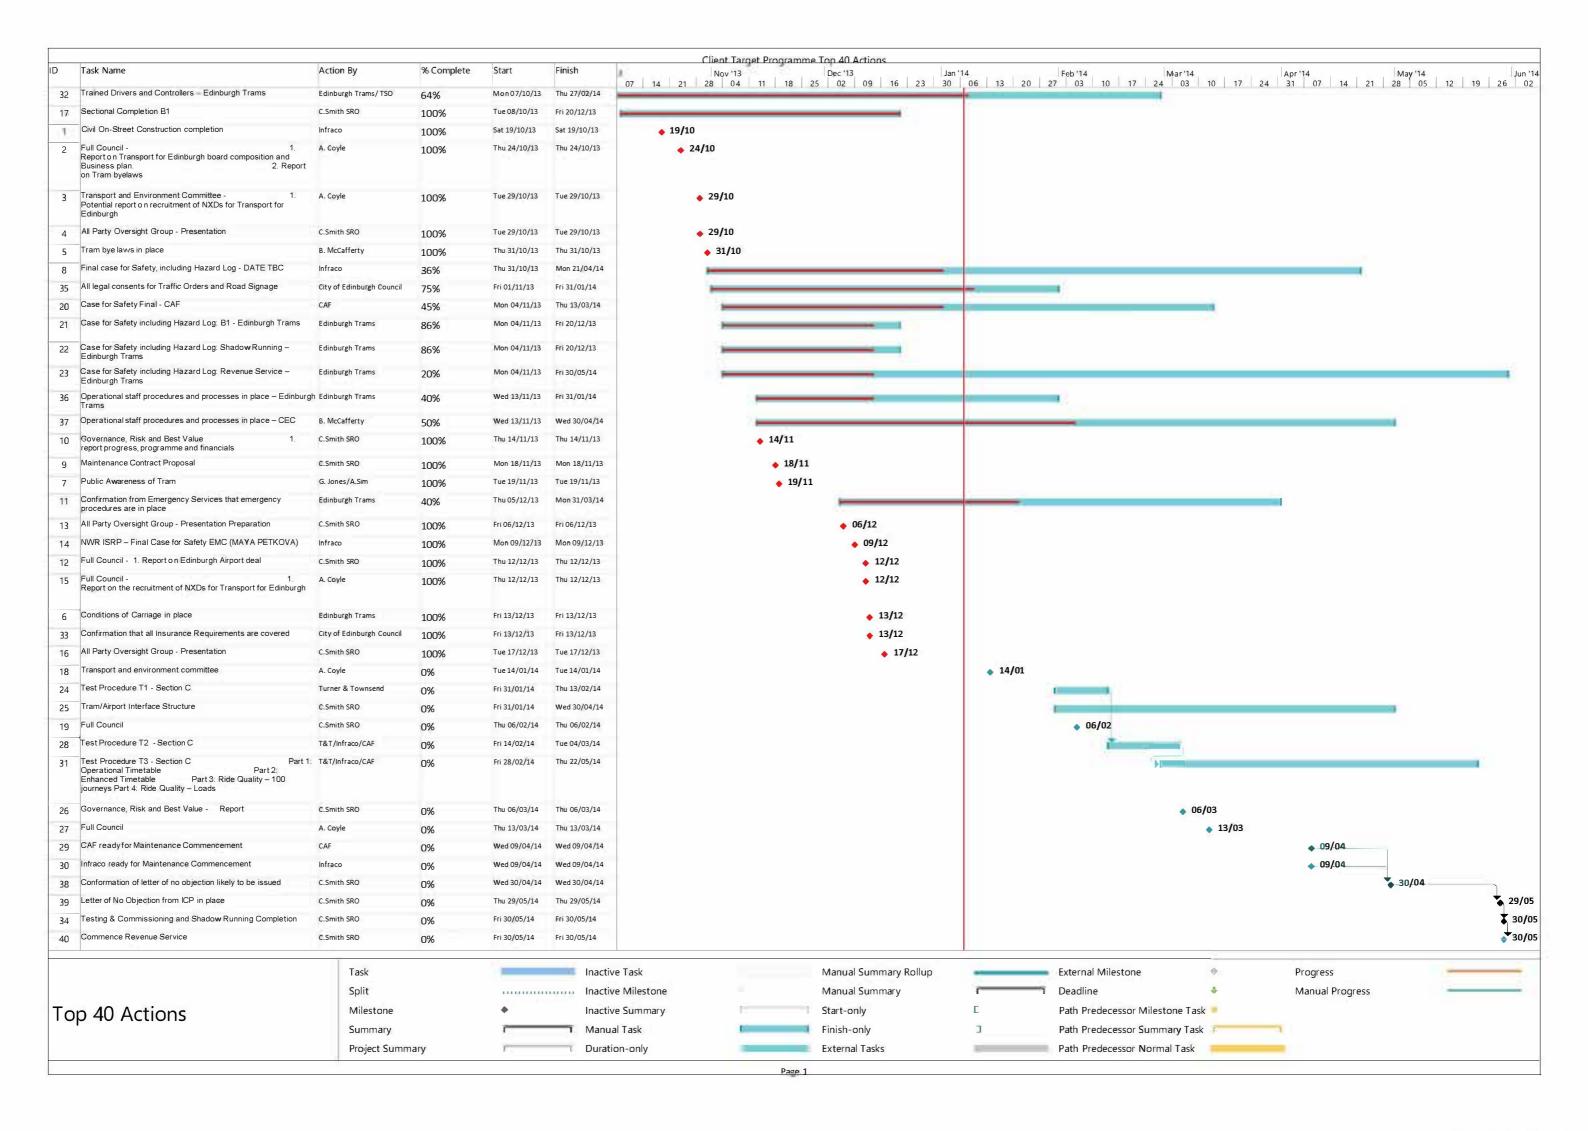

To be instigated and briefed by the Tram SMT (Owners meeting).

Appendix II Third Party Agreements Schedule

Substation Wayleaves - Flaymar(ket	Construction	Substation lease *sgreement between &EC and leaseholder of NR owned land	Documents agreed with NR and SPD. Gueries raised by SPD regarding the plans to be submitted with the head and substation leases.	SPD have not yet agreed proposed head lease plan. Change in personnel at SPD Legal has feel to a delay in resolving this point. AS has contracted new Bivasional Solicitor to confirm revised plans and has recieved a verbal confirmation that the plans are acceptable. Action with SPD advisor to confirm to Confirm.	Construction underway, but energisation at risk if agreements are not concluded.	Close out by end of 2012
Subštation Wāylēāves Calhederat Lane	Construction	Standard substation lease agreement	Offer has been sent to SPD. SPD confirming title. no issues envisaged.	Continue to chase SPO's legal advisor to conclude the documentation. See above regarding changes in SPD Legat personnet,	Construction delay risk if not resolved	Glose out by end Di 2012
Section 21 Buildover 'A'greement with Scotlish Valer: at Ḥaymarket Viaduct	Construction	Søver Buildover Agreement	Drafting has been exchanged between SW and NR Agreement on access protocols to be attained (see above) and confirmation from NR required that an access hatch will be formed as part of the Station redevelopment	All documentation sitting with SWLegal at present	Construction risk for damange to the sewer (deep levet) resides with CEC until the S21 Agreement is executed.	Glose out by Q4. 2012.
Section 21 Buildover Ägreement with Scollish Water Edinburgh Gateway	Construction	Søver Buildover Aggement	Final drafts targetled for confirmation and agreement by 21 Nov.2012	No issues envisaged Expect to be ablet bissue engrossments after 21/11/12	Construction delay risk ifnot resolved	Close out by end No 2012
Section 21 Buildover. Ägröfment with Scottish Wäter Various	Construction	Sewer-Builtgvor, Agreement	SW have grovided a list of locations for both on and offstreet sections. CEC have queried the requirement for on street bruidelves and have saked SVV to justilly this position. SW consider the track formation to constitute a "structure" CEC 40 not agreewith this position? This point to be resolved all MM/CS meeting on 21/11/12. This could significarity increase tife no. ofbuildovers required.	Stagdard agreed werding, will form the basis of these agreements between CEG and SW	Construction delay, risk rfnot resolved	Close out by end N 2012
3 No Building Fixing Agreements Outstanding	Construction	Modified building fixings agreements for 76 Princes St; 78 Princes St and House of Fraser.	CIF, Agreement signed and with CEC for signing Berkley (HoF) agreed with owner, await final lenant confinnation. USS - final draft with USS agent imminent agreement anticipated.	Letter has been Millen to USS agrent regarding tenant confinnation CS to discuss the CIF Agreement with House of Fraser to remove current statemate	If not resolved, CEC will seek a Sheriff Court decision.	Still upclear - daily chasers being mad
North Leith Storage Site Lease Extension	Construction	Storage area in LeithDocksforrail site currently occupied by Siemens	Lease has expired, and CEC seeking extension to end 2013. CEC legal and owner's agent exchanging drafting	Document is ready for execution.	Little risk as site is already occupied, therefore tacil řights in place	Execute document by en a Nov 2012
Site Sharing Licence al Edinburgh Castle	Operations	This agrement is for a licence to permit the installation of radio groupment on Edigburgh Castle (required by Siemens)	Document is now agreed with CEE tregal	Bridge Syslems to serid oùl do'cùment for execution.	Risk of hièlay tò Séimens if not resolved,	Execute documen by enal Nov 2012
	Not critical for construction between Airport and Haymarket, but requires to be resolved before operations					
G.	Critical for construction between Airport and Haymarket					
	Nol critical for construction or commencement of operations					

CRS/SS/CAPROJECTS/EDINBURGH TRAMS - CI 1003\2013\ETPDELIVERY PLAN FOR 2014 V1.1-06JAN14 JANUARY 2014

APPENDICES

## Edinburgh Trams - Third Party Agreements Summary Position @ December 2013

The following sets out the current Third Party Agreement status as at December 2013, and covers off those obligations on CEC and/or the tram project that must be completed prior to commencement of tram passenger operations.

Third Party	Issue	Action & Date to Close Out
Tunes Hotel, Rosebery House and Institute of Chartered Accountants of Scotland	Before & After Noise and Vibration surveys to demonstrate that tram does not increase local noise by more than 3dBA. If so, remedial action on building to be discussed with the parties.	Surveys have yet to be undertaken and the requirement is to redo these surveys no less than 6 months after tram operations.
Verity House Trustees	The new road constructed at the rear of Verity House to include an unobstructed 2m maintenance strip adjacent to the building. There is insufficient land in CEC ownership to achieve this over the full extent of the building.  The road has not been constructed to the IFC specification.	CEC to meet the owners of the property and seek to agree an appropriate level of recompense. It is estimated that up to £75K could be required to maximise the road width (but a full 2m clearance is still not possible).  Target to close out the in early 2014, when the NR station contractor removes from site.
BAM Properties Limited	Land in Haymarket Yards was secured by CPO in 2007. The former owner lodged a CAAD claim regarding this site which CEC later lost. The reporter concluding that in the absence of the tram scheme this land could be used for commercial car parking. An allowance of up to £1.2m has been included within the existing tram budget, but third party is seeking compensation of £1.8m.	CEC and their advisors are considering referring the matter to the lands tribunal.  The risk here is that if a successful outcome is attained, the settlement could be in the region of £900K, but if unsuccessful, this settlement could be as high as £2m (which would include the other party's costs at the tribunal).  CS has been dealing with this matter directly.
Scottish Rugby Union	As part of the hand back of the site following tram works completion, the land handed back must meet SRU's pre-works requirements. T&T to use dilapidation survey photographs in this process.	Site has been handed back. No further representations from SRU regarding remedial works.

# Edinburgh Trams Project Delivery Plan for 2014

Third Party	Issue	Action & Date to Close Out
Network Rail	Bridge Agreement to be executed prior to passenger services. No issues expected in completing the agreement.	Bridge agreement discussed with NR on 10/12/13. CEC to consider agreeing to clause 12.2 as NR unable to move their position. With this agreed, document becomes a conveyance process.
	Operating Agreement to be executed prior to passenger services. No issues expected in completing the agreement.	Operating agreement draft returned to CEC on 11/12/13. CEC seeking to return by 20/12/13
	Site handover in accordance with Asset Protection Agreement.	Part of T&T deliverables with Infraco.  NOTE. NR suggesting that snagging items identified need to be agreed before sectional completion. CS to advise.
	Defects survey to be repeated within 2 years following passenger operations.	Allowance to be made in post operations CEC budget.
	Various land transfer and servitude arrangements to be closed out.	Process agreed to conclude with NR on 10/12/13.
William Ewart Properties (Owners of The Gyle Centre)	Return on non-operational land to The Gyle. Compensation for the balance of land required by CEC to be paid.	District Valuer has offered £20K settlement. Chasing response from William Ewart Properties Ltd
West Craigs Limited	Temp occupied land adjacent to the A8 at Gogarburn has become overgrown with weeds. Obligation to return land to pre-occupation condition. This was for crop/farming use.	AS Meeting with West Craigs on 12/12/13 to close the matter out. Aiming for no action on land.
New Ingliston Limited	CEC acquired 22 acres of land from NIL using the CPO powers. 2005 NIL/CEC agreement requires CEC to return surplus land back to NIL. This surplus land was estimated (based upon the design drawings) at 13.65 acres. CEC to retain the balance of 8.56 acres & compensation was agreed and paid at £2.6m (in Aug	CEC have met with NIL and do not believe their position to be fair and reasonable, given that this strip of land is undevelopable in the context of the existing tramway.  Further negotiations are required to settle the matter.

# Edinburgh Trams Project Delivery Plan for 2014

Third Party	Issue	Action & Date to Close Out
	2011). It has since transpired that a strip of 1.5-2m of land along the boundary of the tramway contains tram related drainage. NIL are unwilling to accept this land back, and are seeking further compensation on a pro rata basis (circa 2 acres at £300k/acre).	CS to Update
Roseburn Garage	Under terms of a licence CEC is obliged to reinstate a building partially demolished by Infraco to create construction space.  A further disturbance and storage costs claim is anticipated from Roseburn Garage.	CEC has made a verbal offer of £105K for full and final settlement. Initially rejected by Roseburn Garage.  CEC has two alternatives; (1) reach a cash settlement for the building reinstatement and all other justifiable compensation claims; and
		(2) Reinstate the building under a separate contract and the settle on the other justifiable compensation claim points.
BT, Scottish Water, Transco and Cable & Wireless	CEC is obliged to deal with any stray current issues to the respective SUC's apparatus in the event that stray current degradation is evident as a result of the tram system.	The stray current measures incorporated within the system design should address the SUC's concerns, but this will only be evidenced after the tram starts operating over the full route.  Target to close out by end Feb 2014.
ВТ	CEC to provide a 10 year warranty in respect of the structure of joint chambers, and a 5 year warranty for duct works undertaken as part of the advance diversion (MUDFA) works.	No issues in respect of BT works have arisen to date.  CEC to retain a watching brief and make appropriate allowances within post tram budgets.
SW Agreement		
Land Prop Compensation	Various GVD settlements in progress and included in current budgets.	

# **Edinburgh Trams - Proposed Meeting Schedule**

# Schedule of Meetings to be included in SRO Delivery Plan 2014

Meeting Title	Frequency
Project Directors weekly Progress Review	4.00pm Mondays
CICM – CEC, Edinburgh Trams, T&T – Weekly	2.00pm Mondays
Payment Application Meetings for CAF and Infraco	Monthly

Appendix IV SRO's Report - Top Ten Risks Schedule

# **Edinburgh Tram Project – Top Ten Risks**

# Update as at 6<sup>th</sup> January 2014

Decreasing Risk	Top Ten Risk —— but steady	Rising Risk	†
-----------------	-------------------------------	-------------	---

De	scription	Status	Owner
1.	Lack of information ready in time for programme		ET/Infraco
2.	Delay due to third party testing, Network Rail and emergency services	1	SRO
3.	Ticketing - Parkeon	_	SRO
4.	Inflexibility within the Infraco programme to meet the Client Target Programme	_	Infraco
5.	Recruitment of key resources within Edinburgh Trams	ļ	ET
6.	Recruitment of key resources within the Maintainer's	-	SRO/ Infraco/CAF
7.	Sufficient funding		CEC
8.	Reliability of infrastructure – re-test requirements	_	SRO/Infraco
9.	Tram availability, reliability and sufficient numbers	_	CAF
10.	Inclement weather	Ţ	

Appendix V General Manager's Report

City of Edinburgh Council – 12 December 2013

# **Executive summary**

# **Bus & Tram Operations at Edinburgh Airport**

# Summary

The purpose of this report is to advise on proposed arrangements in order to offer travellers to and from the city of Edinburgh the opportunity to utilise coordinated modes of public transport to Edinburgh Airport.

This report recommends procuring a bus stance at Edinburgh Airport until 2018 for use by Lothian Buses as part of the Transport for Edinburgh model.

## Recommendations

- Approval from Council to commit the City of Edinburgh Council to the Bus Stance and Tram Operations Agreement and to grant the Director of Corporate Governance the necessary authority to sign this Agreement.
- 2. To delegate authority to the Director of Services for Communities to agree terms with Lothian Buses to operate the Airport Bus Stance.
- To delegate authority to the Director of Services for Communities to define the
  design brief of the Tram/Bus interface with the Airport building extension; this is to
  be done in consultation with the Convener and Vice Convener. A report is to be
  made to Council in February 2014.
- 4. To delegate authority to the Director of Services for Communities to engage in discussions with Edinburgh Airport to explore further opportunities; this is to be done in consultation with the Convener and Vice Convener. A report is to be made to Council in February 2014.

## Measures of success

A successful, customer focussed integrated travel experience on plane, bus and tram from Edinburgh Airport to and through the city of Edinburgh

# **Financial impact**

The financial implications of this report will be reported in full to Elected Members in the form of a confidential data room. All elements of this report are critical to ensuring a sustainable integrated transport offering for the city.

# **Equalities** impact

There is an ongoing full equalities impact assessment being undertaken in relation to the Edinburgh Tram project to ensure that as implementation progresses the equalities impact assessment is maintained.

# Sustainability impact

As part of a broader sustainable transport strategy within the city, it is anticipated that the tram will make a positive overall contribution to the environment by encouraging modal shift from private vehicles to public transport and mitigating the impacts of population growth and commuter and visitor generated traffic.

# **Consultation and engagement**

High level consultation has taken place with Lothian Buses on the agreement proposed in the report.

# **Bus & Tram Operations at Edinburgh Airport**

# 1. Background

- 1.1 The City of Edinburgh Council ("CEC") and Edinburgh Airport Limited ("EAL") wish to enter into arrangements relating to Tram and Bus operations. The intention is to coordinate through Transport for Edinburgh and Edinburgh Airport, a travel experience on plane, bus and tram in order to maximise efficiency of transport modes from Edinburgh Airport to and through the city of Edinburgh.
- 1.2 Lothian Buses have operated a bus stance at the Airport formally for eight years. The terms of this arrangement have reached expiry. This report seeks to ensure that the existing access arrangement is maintained until 2018.
- 1.3 The Tram project has had an interface with the Airport management team over recent years, dealing with pre-construction arrangements and the coordination of construction works and consents in and around the Airport campus. This report seeks to advance and progress future mutual opportunities in a coordinated way for Transport for Edinburgh and Edinburgh Airport.

# 2. Main report

# **Bus Stance and Tram Operations**

- 2.1 Lothian Buses has operated a bus stance at Edinburgh Airport since 2005. The proposal before Council is to bring in 2014, for the first time, a consolidated offer of Lothian Buses and Edinburgh Trams transportation to and from Edinburgh Airport.
- 2.2 Securing this agreement would provide a connection between Edinburgh Airport and Transport for Edinburgh, to ensure that the arrival and user experience to and from Edinburgh Airport by land is well managed and efficient and that matters of cleanliness, services, way signage, ease of information and ticket sales meet the highest standards. These standards will be reviewed and monitored in the first instance jointly by Edinburgh Airport and the Council. Thereafter, any recommendations arising will be reported to Transport for Edinburgh and the Airport's senior management team.
- 2.3 The bus stance agreement runs from December 2013 until November 2018.
- 2.4 The Council will enter into an agreement with Lothian Buses to operate the bus stance.

# **Tram/Bus Interface with New Extension to Airport**

- 2.5 The existing design of the Airport tram stop provides for the Tram stop as built, together with an open, hard standing area that will accommodate ticket vending machines and passenger information display pods.
- 2.6 In consideration of the new extension to the Airport, discussion with the Airport has commenced and is ongoing to ensure that a coordinated approach to design is maintained to achieve visibility of tram and bus operations, thereby wayfinding and interfacing the two site boundaries and uses.

# 3. Recommendations

- 3.1 Approval from Council to commit the City of Edinburgh Council to the Bus Stance and Tram Operations Agreement and to grant the Director of Corporate Governance the necessary authority to sign this Agreement.
- 3.2 To delegate authority to the Director of Services for Communities to agree terms with Lothian Buses to operate the Airport Bus Stance.
- 3.3 To delegate authority to the Director of Services for Communities to define the design brief of the Tram/Bus interface with the Airport building extension; this is to be done in consultation with the Convener and Vice Convener. A report is to be made to Council in February 2014.
- 3.4 To delegate authority to the Director of Services for Communities to engage in discussions with Edinburgh Airport to explore further opportunities; this is to be done in consultation with the Convener and Vice Convener. A report is to be made to Council in February 2014.
