Thanks Susan.

I've got a couple of specific questions, which I hope you'll be able to provide further info. As a general comment though, have *tie* identified costs for all items that will require BBS changes?

- The scope of the works related issues refer to the status of the design as of 25th November. Our concern is that if the design has changed, or at least developed, since then (and say a prior approval has been granted) then a change will need to be issued. Have *tie* undertaken an exercise to determine the extent and cost of changes that will be required since the design freeze in November?
- Combined poles – why has this not been included in BBS's price? It's been in the design for over a year, and is in the tram design manual. Combined poles are what have been approved to date. Can you give an indication how much this is likely to cost please?

Regards

Andy Conway

Andy

I know that you have seen this in another form today already from Stewart. This gives you a tidied up version.

Susan
