Gents

In advance of our meeting on Monday – please see the attached. This sets out the current governance structures and arrangements (thanks largely to Stuart’s paper) and goes on to identify some issues as I see them (and I would stress is is how I see them) and how we could consider streamlining and improving on how things work. Much of this may be a bit radical or even too direct to take to Richard and Vic in its present form, but it is intended to help get the most out of our meeting on Monday, following which we can amend, add or expand on this paper.

I’m not sure what the intended purpose of this is, but I suspect it will at some point be debated with Sue and Dave.

Regards  
Al
