Edinburgh Trams Tender Issues

06 March 2006

CORPORATE FINANCE

Disclaimer

Z

This presentation has been prepared by KPMG Corporate Finance solely in connection with and for the purpose of presenting to the Scottish Executive ("SE") in respect of the Edinburgh Trams Project

Z

Our presentation should not be regarded as suitable to be used or relied on by any party wishing to acquire any right to bring any action against KPMG Corporate Finance in connection with any such use or reliance other than the SE for any purpose or in any context. Any party other than the SE who obtains access to this presentation or a copy and chooses to rely on this presentation (or any part of it) will do so at its own risk. To the fullest extent permitted by law, KPMG Corporate Finance will accept no responsibility or liability in respect of our presentation to any person or organisation other than the SE.

Z

This presentation has been based on preliminary information provided by the SE and, whilst the information in this document has been prepared in good faith, it does not purport to be comprehensive or to have been independently verified. KPMG Corporate Finance does not accept any responsibility for the fairness, accuracy or completeness of the information so provided and shall not be liable for any loss or damage arising as a result of reliance on the presentation or on any subsequent communication, save as provided for under the terms of our engagement.

Z

This presentation has been solely prepared for the purpose referred to above and is confidential to the SE. It is presented on the understanding that it is not communicated, in whole or in part, to any third party without KPMG Corporate Finance's prior written permission. Any disclosure of this presentation beyond what is permitted under the terms of our engagement will or may damage KPMG Corporate Finance's commercial interests. If the SE (or any other public authority to whom the presentation will or may be disclosed) receives a request for disclosure of this presentation under the Freedom of Information Act 2000, having regard to these actionable disclosure restrictions, KPMG Corporate Finance must be informed and no disclosure should be made without KPMG Corporate Finance's written consent.

Three Issues

Value for Money

Is this the “best” contract in the long term?

Affordability

Will this fit within the budget/plans?

Headroom

What is the chance of a failed tender?

Strategic Choices for the SE

Z

March and April are key months for the project:

-

Bill coming close to Assent;

-

tie are finalising the tender documents;

-

They need your consent.

© 2006 KPMG LLP, the U.K. member firm of KPMG International, a Swiss cooperative. All rights reserved. This document is confidential and its circulation and use are restricted. KPMG and the KPMG logo are registered trademarks of KPMG International, a Swiss cooperative.

Strategic Choices for the SE

Z

tie are working on an input based tender with detailed specifications in all three contracts.

Z

These will then be controlled and coordinated by tie.

Z

tie's latest proposal is for 100% of the payments to be made through "finely graded milestones". There would be a performance bond equivalent to a 5% turnkey payment and a 5% payment after the first 6/7 years – i.e., 90:5:5.

Z

There are two arguments for holding on to some medium term arrangements:

-

They are likely to offer value for money; and

-

They appear likely to help the SE with some of the affordability issues. It is

very hard for tie to argue against the affordability issues.

Strategic Choices for the SE

Z

KPMG have a view that conventional procurement for light rail can lead to overspend and delays – which will be brought to your attention only late in the construction process, and at a time when you have no realistic option other than to pay more money.

Z

tie feel that they have learnt the lessons of past procurements and can do better. This line has been used before; unfortunately there has been no shift in the results measured.

Z

The question here is how hard you want to push tie.

Strategic Choices for the SE

Clear Finance Arrangements with Gain and Pain Agreement

Z

These present a different set of questions; many of which are internal to the Executive.

Z

The concept is simple: before the tender starts, there should be a clear understanding between the 3 parties, including CEC, as to who is paying what and when, and what happens

if the price moves from the current expected point. These arrangements will prevent a tender

being launched which cannot succeed, and should also help incentivise tie and CEC to hold

the costs down wherever possible.

Z

There is further work going on here; and any package will have to be negotiated with tie and

CEC. But it is worth thinking what the end point might be:

- Agreement from CEC as to when and how £45m is being put in;
- Agreement from the SE as to the indexation arrangements;
- Agreement from the SE that there will be extra funding for financing costs, except for CEC's share;
- Agreement as to what happens if there is an underspend. KPMG have assumed that more railway is built; but this may not be practical for a small underspend;
- Agreement from CEC to absorb the first £[X]m of any overspend – e.g., £20m;
- Agreement from CEC and the SE to put in additional funding to cover any further overspend up to an agreed limit when the project would be cancelled. A 30:70 split might be the outturn.

Strategic Choices for the SE

Z

On present numbers, costs of £550 million are quite possible.

Z

A contingency must be factored into the total project cost – e.g., at least 5%, perhaps 10% for additional costs towards the end of the tender period.

Z

The concern here is how such a deal would look inside the Executive, and how it would sit against the public debate over the last month or so.

Possible Gain and Pain Mechanism

Gain

Likely answer – more railway

A, B, C: Tranches of cost saving on available budget

x, y, z: Percentages of tranches gained by the SE

$$\text{GainSE} = (A \times [x\text{SE}] \%) + (B \times [y\text{SE}] \%) + (C \times [z\text{SE}] \%)$$

Example:

SE Budget Contribution = £475m; CEC Budget Contribution = £45m; Total Project Cost = £500m

A = £15m; B = £5m; C = [remainder]

x = 75%; y = 50%; z = 0%

GainSE

$$= (£15\text{m} \times 75\%) + (£5\text{m} \times 50\%) + (£0\text{m} \times 0\%)$$

$$= £11.25\text{m} + £2.5\text{m} + £0\text{m}$$

$$= £13.75\text{m}$$

Therefore, SE's revised Budget Contribution is (£475m – £13.75m) or £461.25m

$$\text{GainCEC} = (A \times [x\text{CEC}] \%) + (B \times [y\text{CEC}] \%) + (C \times [z\text{CEC}] \%)$$

Using the same example, CEC's revised Budget Contribution is (£45m – £6.25m) or £38.75m

Possible Gain and Pain Mechanism

Pain

A, B, C: Tranches of cost overrun on available budget

x, y, z: Percentages of tranches incurred by the SE

$$\text{PainSE} = (A \times [x\text{SE}] \%) + (B \times [y\text{SE}] \%) + (C \times [z\text{SE}] \%)$$

Example:

SE Budget Contribution = £475m; CEC Budget Contribution = £45m; Total Project Cost = £570m

A = £20m; B = £20m; C = [remainder]

x = 25%; y = 50%; z = 75%

PainSE

$$= (£20\text{m} \times 25\%) + (£20\text{m} \times 50\%) + (£10\text{m} \times 75\%)$$

$$= £5\text{m} + £10\text{m} + £7.5\text{m}$$

$$= £22.5\text{m}$$

Therefore, SE's revised Budget Contribution is (£475m + £22.5m) or £497.5m

$$\text{PainCEC} = (A \times [x\text{CEC}] \%) + (B \times [y\text{CEC}] \%) + (C \times [z\text{CEC}] \%)$$

Using the same example, CEC's revised Budget Contribution is (£45m + £27.5m) or £72.5m

N.B. Much easier on a model/graph

Model Outputs

Capital and Resource Budget Impact

The following graphs illustrate the SE's Capital and Resource Budget cash outflows for the following scenario:

- Total Project Cost – £484m + 5% contingency;
- SDS, MUDFA, Land Costs, and Other Costs funded through milestones;
- Infraco and Tramco funded through 50% milestones, 25% turnkey (financed by 6 year prudential borrowing by CEC) and 25% on-Balance Sheet PPP (6 years).
