IDM(06)15.doc

Damian

I've added some detail to the IDM report - I assume you are using this as the basis for submission. If you have changed things significantly I can input tomorrow. You will note that a trawl of the STAG report to include additional benefits has not been entirely positive.

I am particularly concerned that the accessibility analysis is based on the weighted (by tram IVT) journey time. This is fine technically and methodologically but does present a somewhat misleading picture.

Happy to discuss,

Andy
