CLIENT : TIE Limited (310299)
MATTER : Infraco (15)

Telephone call with Tony Rush to discuss Carlisle HoTs.

T.R. still perturbed by lack of **tie** management. Critical of Stewart G's note on availability. Again, not sure that R.J. is "on his side" so far as the need to lead and be involved himself in decision-making. **tie** team not energetic enough.

I said that **tie** team very concerned for future of Project. T.R. said they need to face up to reality and admit errors. We discussed T.R.-SMcG's 'face off'. T.R. said reacted to SMcG saying "you want" - T.R. does not 'want', he is trying to solve **tie**'s problems and thinks **tie** do not want to be accountable. G.B. was, in T.R.'s view, talking bollocks when he said no one left from Wiesbaden deal - T.R. says there are people left who knew the story.

We went over Clause 80 drafting - my concerns this will be read and savaged by BSC - T.R. not concerned by this but took on board my comments on Clause 80.10 - to improve it Perf Bond - to be included Schedule 14 - to be "red lined". App 1 - replace with T.R. version; headers, footer, watermark and footnotes. Dennis' input.

T.R. content with HoTs as opening gambit. We need to start somewhere.
