Jason,

When will tie receive the OCT revised layout which was promised for week commencing 25th October 2006?

In addition, one of the principles agreed at the changes meeting is that tie will not be paying for SDS to prepare change estimates as the resource is already accounted for in the project.

Enough of this, I offered weeks ago to write the drafts of these for you. It saves me having to take what you write in draft, correct it, you update it, us correct it, you change it etc.

I agree that tie can ask SDS to do whatever you want, just surprised that having Early Operator Involvement you might want to draw on them for this element.

Your choice, we will reflect the cost of preparing the opex estimate in our change order fee.

Regards,

Jason

Jason,

The offer was after it was drafted and tie is the client and we will decide what we want as part of the change notice. I don't see what the problem with capex and opex cost indicators is?

Ailsa,

This is the second time that we have removed OPEX for from the change order. Please check your marked up version that I handed to you and confirm you will change it. Why don't you accept the offer that I made to write them for you?

Jason,

Too late , I have issued the change order including opex requirements.

Ailsa,

The slightly amended change control for Ocean terminal. A few typos but the only significant change is the removal of the opex costs which I assume you would prefer to get from Transdev?

Regards,

Jason

Jason,

I attach the final draft of the change notice for review prior to formal issue. Comments please by Wednesday lunchtime.
