Mark/Gerry

As a result of our conference call on Friday, we have completed a review of the estimated risk values on the Line 1 register taking account of the mitigation measures discussed for each of the items of identified capex risks. We have run a simulation from this latest set of data and attached is a summary of the output, as requested and discussed this morning. We will now carry out a similar exercise from the Line 2 register and report the output in the same manner.

Please let me know if you require any further details or clarification.

Regards,  
Neil
