Alan Coyle The City of Edinburgh Council alan.coyle@edinburgh.gov.uk

Graham Porteous Transport Scotland <u>Graham.porteous@transportscotland.gsi.gov.uk</u>

**ACTION NOTE** 

ITEM ACTION DEADLINE OWNER

## 1 PREVIOUS MINUTES 6 DECEMBER 2012

## Decision

To approve the minute of 6 December 2012 as a correct record.

## 2 SRO's REPORT

Colin Smith advised that a meeting had been held with Carillion to discuss the quality of works in respect to the Mudfa contract. Carillion had agreed to review the information and Colin Smith would re-engage with Carillion to undertake the next step. Vic Emery enquired whether similar discussions would be required with other contractors to discuss their involvement. Colin Smith confirmed that there would be discussions with other contractors. It was noted that Transport Initiatives Edinburgh (*tie*) had previously agreed a final settlement with Carillion. For this reason it was unlikely that any settlement would involve a financial sum. Other forms of value from, say, set off should be considered.

Details of the Birmingham enquiry involving the sale of tram vehicles had been received and these would be provided to the Chief Executive.

Henderson Global Investors (HGI) had engaged with surveyors to explore in more detail the possibility of expanding the tram service along Leith Walk. Colin Smith and Alan Coyle would be meeting with HGI on 18 January 2013 in Glasgow to discuss Cathedral Lane substation and possible expansion plans. Sue Bruce asked that Peter Watton and a representative

CS

## Project Delivery Group 10 January 2013

ITEM	ACTION OWNER	DEADLINE
from Economic Development were also present. Colin Smith agreed to contact the relevant officers.	CS	
Vic Emery enquired as to how much of the project's stock remained in storage, the value of such stock and how this is calculated. There would be a need to assess accommodation and price taking into account the possible long term nature of storage. Colin Smith advised that Turner and Townsend had been asked for this information and details would be provided in a report released on 18 January 2013.	CS	
A strategy discussion report had been created to provide information for Councillor Hinds. After discussion it was agreed that mention of the Tram SMT would be removed from the chart but it would make clear that Alan Coyle would fulfil the role of Tram Project Liaison Officer for city centre groups. Further minor changes to the document were provided that Colin Smith would amend and circulate.	CS	
The programme for 2013 was presented to the group and it was advised that the focus should be on the Siemens aspects of works. A tamping machine was necessary for upcoming works and the expected date for its use would be later than programmed. It was advised that preliminary discussions had been made with regard to running trams from Edinburgh Airport to Edinburgh Park in October. This would be dependent on the date of tamper delivery.		
Marco Biagi MSP had requested a one-to-one brief on the tram project. It was agreed that Graeme Porteous and Transport Scotland would liaise with Marco Biagi MSP.	GP	
It was advised that the tram project would no longer require assistance from Mott Macdonald with the testing and commissioning process. Vic Emery requested what the Key Performance Indicator (KPI) targets of the tram testing and commissioning process would be. Colin Smith agreed to organise the approximately 800 different tests under headings addressing their KPI targets and report back.	CS	
Discussions had been held with Scottish Water regarding Leith Walk works. It was advised that final costs were yet to be agreed. The budget was £900k but the aim would be to see if £400-500k would cover		

DEADLINE

the works. This would include a safe system but would not cover manhole reconstruction.

Vic Emery enquired as to progress with works on the Murrayfield Corridor. Colin Smith advised that he had no major concerns and that Scottish Rugby Union (SRU) had given permission for construction works to take place on their land.

It was advised that key elements had been lifted from the Project Delivery Plan and these had all been introduced to the agenda for regular Monday meetings held with Turner & Townsend (T&T).

Vic Emery requested an update on the status of the defects at the Gogar depot and the manholes on Princes Street at the next Project Delivery Group meeting on 17 January 2013.

CS

## 3 OPERATING AGREEMENT – HEADS OF TERMS

Alan Coyle gave details on the Operating Agreement – Heads of Terms. Discussion focussed on the governance arrangements and the estimated financial costs to 2033. Alastair Maclean advised that it was essential that a deal with the airport was concluded alongside the Operating Agreement. It was advised that a report would be considered at the full council meeting on 31 January 2013.

## 4 GOVERNANCE, RISK AND BEST VALUE COMMITTEE DRAFT REPORT

Alan Coyle outlined the Tram Update report due to be considered at the Governance, Risk and Best Value committee (GRBV) on 24 January 2013. It was noted that there had been no significant change since consideration of the previous Tram Update on 6 November 2012 but that the financial information had been presented in accordance with the Committee decision in November.

It was advised that draw down of risk was higher in the period due to utilities drawdown and the value engineering contribution.

Sue Bruce advised that it should be ensured that the report contained no ambiguous terms that could be misinterpreted.

## Project Delivery Group 10 January 2013

ITEM	ACTION OWNER	DEADLINE
Alastair Maclean highlighted that there could be questions on the cost of work done and the relative costs of on and off street works. Alan Coyle agreed to add a footnote detailing reasons why off-street works were significantly more expensive than on-street works.	AC	

## 5 AOCB

Vic Emery requested that a run-down of pro-active safety arrangements being taken to address health and CS/BMC safety issues was delivered at every Project Delivery Group meeting starting 17 January 2013

## 6 DATE OF NEXT MEETING

17 January 2013 at 8am in the Chief Executive's Board Room.

Programme / Tram Operations

## SUMMARY OF ISSUES DISCUSSED WITH TOM NORRIS / MARIE HERNANDEZ - EDINBURGH TRAMS THURSDAY 10<sup>TH</sup> JANUARY 2013

## **Optimum Time Line for the Project - Key points:**

## (1) Timing of pulsing of trams (i.e. 6.5, 7.5, 8.5 minutes)

From an operator's point of view 10 minutes is the most attractive. Financial information prepared to date relates to timings of around 7.5 minutes.

## (2) Resources

Without premium costs being incurred, in order to get a full resource for a 7.5 minute service to be ready for February 2014, the button would need to be pressed now to commit to February 2014.

## (3) Weather

These arguments and issues are already known.

## (4) Tamper

I will try and obtain this from Infraco for June and work double shifts.

## (5) Grinding

Again, I must try to get Infraco to grind the rails before tamping, rather than post.

## (6) Murrayfield / Gateway Works

That the Gateway works and Murrayfield corridor (i.e. OLEs, Scottish Water and Network Rail) stay on programme.

## (7) *ICP*

The ICP will request that operational experience is required from the Airport to Edinburgh Park at the earliest possible time.

## "Soft" Opening Strategy

In my experience, to allow for good communications and for a de-bugging/float period, a "soft" opening of the service is required.

To that end, I have suggested that the following strategy is targeted, which has been wholeheartedly supported by Tom and Maria.

- (a) Aim to get Civils complete by July/August.
- (b) Tamper complete by June.
- (c) Have trams running from the Airport to Edinburgh Park by October 2013 on the basis of a limited passenger service (either free or revenue discounted), using trained drivers per the existing resource programme.

Project: **Document Type:** 

Edinburgh Trams Project **Briefing Note** 

Reference: Programme / Tram Operations

(d) From December 2013 to February 2014 run a 10 minute service. This would run alongside drivers still being trained and during shadow running; again, this could be a free or revenue discounted service. Over this period we would expect commissioning issues, breakdowns and delays as systems bed in. During this time, subject to demand analysis, the service phasing could be set for 6.5, 7.5, 8.5 or 10 minutes.

My own thoughts would be that passenger services should be free during this "soft" opening period and that it should be explained that this is a "shadow running" phase, i.e. that services are not running to a timetable while systems are being "de-bugged", as well as affording passengers the opportunity for a "taster". Issues to be overcome include communications and the financial impact on bus revenue.

Before I start to direct the team in this direction, I would appreciate your thoughts and guidance.

Colin Smith 15<sup>th</sup> January 2013
