A

I have marked up comments on the slides in block capitals.

There seems to be no awareness of all IOBC/OBC work. Existing sign off from stakeholders. NAO Report etc a proper review of the current strategy has not been carried out. Can we refer to original review of options - this may have been appendix to one of the pwc reports. Original work with puk et al needs to be shared.

Changes will cost huge amounts of money, will need new procurement and potentially scare off any bidders. The mandatory variant route is the only way to go. I need to draft this up tomorrow morning. Will send you copy for you to review and send on.

Also, the MUDFa evaluation approval is troubling.

Will call

Please see attached preliminary version of the work that Keith and I have prepared so far. Apologies for the late emailing and the rough edges, a tidied up version will be available for Monday.
