Attention: David Simmons

Dear David

Failure to Provide the Agreed Design Deliverables IFC Submission to tie and SUC Approvals drawings

Our Client has again made complaint against the SDS Team for poor performance with certain utility deliverables. This letter is particular to the Section 1B deliverables for Scottish Water.

Our Client has complained to us regarding the poor turnaround performance and failure to deliver materials to SW for approval and further IFC materials to tie in order that the construction work plans may be executed.

Halcrow attended a meeting on Thursday, 26th July 2007 where SW confirmed a 12 point requirement to be amended to the previously submitted SW drawings (submitted for SUC Approval). Concern was shown by tie and SW that previous SUC comments had not been taken on board and the previously requested standard drawings and schedules were missing. (Our Client, tie, is of the opinion 75% of the comments had previously been communicated to the Halcrow design team.)

PB record one working week later (Friday, 3rd August 2007) the following deliverables remain outstanding

- Formal IFC Drawings to be issued to tie
- Thrust Block Standard Details (previous request)
- Composite Drawings to be issued to tie (promised delivery 2nd August 2007)
- Close out confirmation from SW that the drawings are acceptable and technically approved
- Documented response to the 12 point review comments made by SW. (Confirmed to be with the re-submission of the SW amended drawings). This deliverable is still awaited.
- SW standard details with SW acceptance / approval

For the avoidance of doubt PB are to date awaiting the Section 1B closure file from Halcrow confirming, in writing the acceptance/approval response from each SUC. Without this, the audit trail and completion exercise remains open.
