Subject: York Place - urgent issues

tie,

CUS will, unless urgent attention is given by all parties involved, be forced to stop the majority of diversion works on York Place. If we break down the work into main utilities in this area, the issues are:
BT - Awaiting confirmation from BT regarding chamber position and various duct routes - CUS have an instruction for three further trial holes, only one left to dig - TQ's outstanding
GAS - Awaiting drawing and instruction
S.P. - Awaiting drawing and instruction - outstanding TQ's
Water - All water diversions that can be carried out are complete within the present TM
V.M. - Outstanding TQ's

Along with the original IFC's, the redesigned diversion drawings received and information still to be received, CUS feel that there has been little attention or consideration given to the fact of the existing utility congestion on the North side of York Place which could lead to major issues during and upon completion of all carriageway crossings of York Place. I accept that there has been a workshop planned for this area, however that does not solve the issues that will prevent works from progressing in line with the programme from Monday 13th July 2009.

I hope you will give this matter the urgency it requires.

Regards

Stuart Robinson
