**Subject:** NR immunisation

Neil,  
Steven and I concluded the discussion on NR immunisation on friday. I guess the simplest way to describe the additional clarifications are:

- 750k liability cap as you understand the term.
- bbs take the first 375k of cost above the 3m anticipated costs
- then there is a pain share with tie on 50-50 basis above 3.375 upto 4.125
- any costs above 4.125 is with tie.

Please make the necessary drafting changes.  
Thanks  
Michael
